### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.**

## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Longo on 26 May 2009.

The application has been amended as follows:

Amend claim 38 as follows:

38. (Currently Amended) A computer readable medium encoded with a computer program ~~project~~ product loadable ~~in the~~ into a memory of at least one computer and comprising software code portions ~~capable of~~ for performing the method of any one of claims 20-26.

The preceding amendment is submitted to overcome a potential rejection under 35 U.S.C. 101.

### ***Allowable Subject Matter***

Claims 20-38 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 20 and 27 require searching for an update function in a lookup table using a previous value of estimated noise power and a current value for a mean input power spectral density as a first and a second entry for the search. As illustrated further below, the prior art of record does not disclose or suggest, in combination with the other features of the claims, these limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wynn (U.S. Patent 5,761,883) disclose looking up frame LSP weights in a table in a noise reduction process, but do not disclose or suggest using a previous value of estimated noise power and a current value for a mean input power spectral density as a first and a second entry for the search. Vimur et al. (U.S. Patent 4,811,404) disclose determining a voice metric through a table lookup in a noise reduction process, but do not disclose or suggest using a previous value of estimated noise power and a current value for a mean input power spectral density as a first and a second entry for the search. Samuelsson et al. (U.S. Patent Application 2006/0116874) disclose a noise filter that looks up filter coefficients in a table, but do not disclose or suggest using a previous value of estimated noise power and a current value for a

Art Unit: 2626

mean input power spectral density as a first and a second entry for the search.

Davidson et al. (U.S. Patent 5,632,003) disclose determining a power spectral density estimate using a lookup table, but use bandwidth and frequency as lookup entries.

Preuss (U.S. Patent 7,478,043) discloses looking up power spectral densities in a codebook. Rogers (U.S. Patent 6,823,176) describes storing a noise masking signal in a lookup table. Vilnrotter et al. (*Table Look-Up Estimation of Signal and Noise*

*Parameters From Quantized Observables*) disclose a table lookup for removing noise from communication signals, but do not disclose or suggest using a previous value of estimated noise power and a current value for a mean input power spectral density as a first and a second entry for the search. McAulay et al. (*Speech Enhancement Using a Soft-Decision Noise Suppression Filter*) disclose a noise suppression filter method comprising looking up a gain in a table lookup, but do not disclose or suggest using a previous value of estimated noise power and a current value for a mean input power spectral density as a first and a second entry for the search.
